

## Project Summary

Lindum was awarded the contract to build and fit out the new Anglia Regional Co-operative convenience store in Cambourne.

The project comprised of a single storey steel frame building located within a predominantly residential area in this busy Cambridgeshire town. Due to the site location, it was very important for the success of the project that Lindum liaised closely with the local community, and particularly nearby residents to ensure their considerations were taken into account.

Engaging with the community is always key for Lindum and helps achieve good relations and successful project outcomes. In Cambourne, for example, we invited children from the local school to have a tour of the site - Lindum employees of the future!
