

Project Summary

Lindum undertakes all planned and reactive maintenance for Progress Housing Association in Lincolnshire and Nottinghamshire covering a domestic property portfolio of 250 homes and including 24-hour call-outs.

Key elements of the service include joinery, brickwork and roofing repairs, plumbing, heating and electrical. Lindum also carries out a large number of planned replacements of external doors to properties, as well as kitchens and bathrooms.

We carry out approximately 45 individual calls per week to properties where the majority are providing specialist residential care to various tenants with special needs so extra consideration is required.
